SUMMARY

MCA graduate with experience working across multiple roles, including Business Analysis, Quality Assurance, Frontend Development, UI/UX Design, and Team Leadership. During my internships, I had the opportunity to work closely with cross-functional teams throughout the software development lifecycle, contributing to both product planning and successful feature delivery.

My responsibilities included prioritizing product backlogs by organizing bugs, feature requests, and enhancements, writing acceptance criteria, and reviewing them with Product Managers to ensure requirements were clear and aligned with business needs. I regularly participated in feature demos, shared feedback with development teams, and performed end-to-end validation of features before release to ensure they met functional and business expectations.

I actively contributed to Agile ceremonies such as Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives, collaborating with developers, designers, testers, and stakeholders to keep projects on track. Working across different functions has given me a strong understanding of both the technical and business aspects of product development, along with the ability to communicate effectively, solve problems, and adapt to changing priorities. I am looking to leverage this experience in a Business Analyst or Project Management role, where I can contribute to building products that deliver real value to users and the business.

INTERNSHIP

Business QA Engineer Intern

April 2026 - Active

Skypoint Cloud

- Performed functional, regression, integration, UI, and end-to-end testing for SaaS applications, ensuring high-quality releases and application stability across multiple modules.
 - Collaborated with Product Managers, Developers, and Designers to refine requirements, prioritize backlogs, define acceptance criteria, and validate implemented features against business needs.
 - Executed regression, sanity, security, and release testing, including weekly vulnerability scans, analysis of findings, and preparation of security assessment reports.
 - Created and maintained test cases, test documentation, and detailed defect reports with reproducible steps, expected results, and supporting evidence to facilitate efficient issue resolution.
 - Participated in Agile ceremonies, tracked sprint progress, coordinated with cross-functional teams to resolve blockers, and supported production deployments, release verification, and sign-offs.
 - Assisted in defect triaging and root cause analysis, collaborated with development teams to validate fixes, performed retesting, and ensured issues were fully resolved before production releases.
-

UI/UX Desinger with figma and a team lead

Oct 2025 - Jan 2026

Xthlete India

- Initially worked as a UI/UX Designer using Figma, creating structured and user-friendly design layouts.
- Demonstrated consistency and design quality, which led to being assigned a leadership role within the team.
- Transitioned into a Team Lead role, collaborating with other interns on their UI/UX design tasks.
- Monitored daily work progress of interns by collecting regular updates and ensuring tasks were on track.
- Managed and supervised all interns within my domain, ensuring alignment with project requirements and deadlines.
- Provided guidance and support to interns by clarifying design requirements and helping improve their work quality.
- Maintained detailed documentation of daily progress, task status, and individual performance.
- Identified delays or issues early and took proactive steps to resolve them and keep the workflow smooth.
- Ensured consistency and quality across all UI/UX designs through regular reviews and feedback.
- Acted as the primary point of coordination for task allocation, follow-ups, and team communication.

Development Intern

Jun 2025 - Aug 2025

Talisma

- Designed and developed a customer dashboard UI for Talisma.
- First designed the UI in Figma, ensuring a clean and user-friendly layout.
- Then developed the UI using React.js for dynamic and responsive rendering.
- Displayed detailed data of a target customer, including profile information, activities, and relevant metrics.
- Used static APIs (arrays) to simulate sample data fetched from an API.
- Built the frontend interface to dynamically display the fetched sample data.
- Completed as part of a 2-month internship.

UI/UX Designer

Mar 2024 - Sep 2024

Reg Vectors

- Built a working prototype of a fun club platform showcasing various activities such as sports, dance, music, and instruments.
- Performed Quality Assurance (QA) work on the project.
- Created and documented test cases for validating features and detecting issues.
- Completed this work as part of a 6-month internship.

PROJECTS

Account Manager Dashboard

- Built an Account Manager Dashboard for managing and analyzing customer data.
- Frontend developed using React.js for an interactive and responsive UI.
- Backend built using Node.js, serving static data for demonstration purposes.
- Enabled the account manager to interact with an AI assistant within the dashboard.
- Displayed overall customer activities in a clear and organized view.
- AI provided suggestions on the target customer to help maintain them as a long-term satisfied client.

VPN mobile Application (Mockup)

- Designed a mobile application mockup inspired by VPN apps.
- Created the frontend UI entirely in Figma.
- Included interactive prototyping to simulate real app navigation and functionality.
- Showcased features like viewing multiple servers, selecting a server, and connecting to it.
- Focused solely on the UI/UX design, with no backend development invol

TenantPro – Property Management System

- Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Git, GitHub, Figma
- Developed a web-based property management platform to streamline rental property operations for landlords and property managers.
- Built responsive user interfaces for managing tenants, properties, lease agreements, rent payments, and maintenance requests.
- Designed an intuitive dashboard to provide centralized access to property and tenant information.
- Collaborated on UI/UX design and implemented responsive layouts to improve usability across devices.
- Integrated frontend components with backend APIs to ensure seamless data management and user interactions.
- Used Git and GitHub for version control and collaborative development.

CERTIFICATES

- Android App Components - Intents, Activities, and Broadcast Receivers from Vanderbilt University!
- Exploring the Internet of Things: Concepts and Applications from Jain Group of Institutes!
- UiPath Academy Automation Explorer Training from UiPath!
- Magic Bus Azure Cloud Skillinh programme from Bangalore Livelihood Centre.
- SOF 1st International Sports Knowledge Olympiad zonal level excellence medal.

EDUCATION

Master of Computer Applications (MCA) | CGPA: 7.8

Jul 2024 - 2026

Jain (Deemed-to-be University)

- Focus areas: Data Structures (Beginner), Networking & Database (Beginner).

Bachelor of Computer Applications (BCA) | CGPA: 8.2

Apr-2022

- Jain (Deemed-to-be University)
- Web Development, Android Development.

ADDITIONAL INFORMATION

- **Technical Skills:**
 - OOPs in Java (intermediate), C++, Reactjs (Intermediate), Nodejs (Basics), Python (Pursuing), HTML, C#, CSS, SQL, NoSQL pursuing)
- **Tools & Technologies:**
 - Android Studio(pursuing), Figma, cisco Packet Tracer (Basics), Word (Intermediate), Canva (Intermediate).
- **Languages Known:**
 - English (Proficient), Hindi (Fluent), Kannada (Fluent), Tulu (Proficient).
